

# Growing up in Year 1/2

In Health we have been talking about how we are changing in our abilities, physical appearance and likes and dislikes. We have discovered so many changes from when we were babies and toddlers to now. We made posters to show how much we are growing.

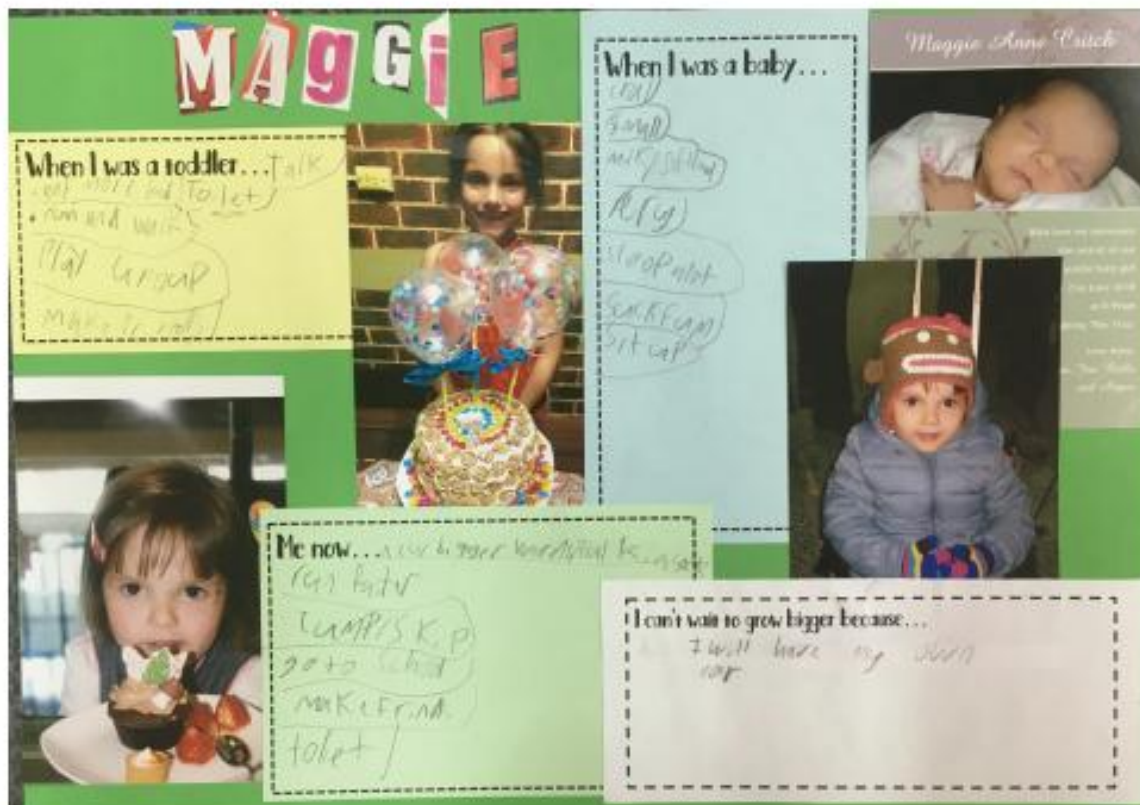

When I was a baby... I could crawl, drink milk, sleep more and sit up.

When I was a toddler... I could talk, make friends and go to playgroup.

Me now... I can run faster, skip and go to school

I can't wait to grow bigger because... I can reach higher

When I was a baby... I was small, I ate soft food and I sucked my thumb.

When I was a toddler... I could run and walk, eat more food and go to the toilet.

Me now... I can use bigger words, swim and play sports.

I can't wait to grow bigger because... I will have my own car.
