

SEASONS K-PP

Students From K-PP have been exploring concepts related to the seasons and the weather.

Together we have learnt how rain is formed and created our own water-cycle system in a bag.

We have made catchments and dams in the sandpit to simulate what would happen if there was a heavy rain event.

We have written about rainbows and observed the clouds. We made clouds and ice sculptures during outdoor activities and enjoyed collecting a variety of 'Autumn' coloured leaves.

The story we have read that reflects our theme is, 'Mr McGee goes to sea,' by Pamela Allen. Ask your child to retell you the story.
